

## UMT-MMS SEA TURTLE CONSERVATION PROGRAMME

In Chagar Hutang, Redang Island, Terengganu

## ABOUT

A 5-year marine biodiversity conservation programme via a strategic collaboration between UMT-SEATRU and MMS focusing on conserving and protecting the sea turtles.

Over the years, UMT-SEATRU has developed strong partnerships with relevant governmental bodies, NGOs and research institutions from around the globe that share the same passion for sea turtle conservation.

## GOALS

To protect and preserve sea turtles through collaboration with UMT-SEATRU towards a sustainable and strategic application of the Centre of Excellence (COE) module for the conservation of sea turtles locally and globally.

## FOCUS AREA

### FACILITIES IMPROVEMENT MANAGEMENT

To upgrade current facilities and develop new facilities for a more conducive learning and research experience.

- I) Living facilities
- II) Educational/outdoor facilities
- III) Utilities, transportation & landscaping

### VOLUNTEER PROGRAMMES

We also provide opportunities for our employees to:

- I) Volunteer their time and effort to participate in the programme
- II) Gain valuable experience in learning about sea turtle conservation

### OUTREACH PROGRAMME

Our outreach programme includes the following activities:

- I) Educational/school awareness
- II) Public/community awareness
- III) Providing environmental educational material such as newsletters and merchandise
